Social Media

More than ever, social media applications are being used to advertise, promote, and facilitate narcotic sales across the board.

The types of drugs advertised in open source are no longer just small amounts of marijuana and cannabis, but now pounds of mushrooms, boats of fentanyl and kilos of cocaine are not only displayed but sales are facilitated through common applications such as Instagram, Facebook, Facebook messenger and SnapChat

SNAP is the current trend, but Instagram, Telegram and Facebook messenger are also used regularly

Fentanyl Facts for AZ 8th, 10th and 12th graders

4 out of 5 youth say no one has **EVER** talked with them about Fentanyl

1 out of 10 say Fentanyl is sort of easy or very **EASY TO GET**

Talk early, talk often

- Ask the child what they know about Fentanyl
- Explain that knowing about Fentanyl helps people stay safe
- Cover the basics
- Warn them about fake prescription pills sold online or shared at parties

Establish a Rescue Plan
